技術數據

The graph illustrates the relationship between flow rate and valve response time. The x-axis represents Flow / 流量 - Q (l/min) from 0 to 40. The y-axis represents Time / 反應時間 (ms). Two curves are shown: 'Opening' (打開) and 'Closing' (關閉). The 'Opening' curve shows that response time increases with flow rate. The 'Closing' curve shows that response time decreases with flow rate and then levels off at higher flow rates.
